

Registration No.	Number 00071		
Registration Date	October 6, 2010	Registration Category	Category 2

Name (Model, etc.)	FUJIX DS-1P		
Location	Minato City, Tokyo Metropolis		
	FUJIFILM Corporation		
Owner (Custodian)	FUJIFILM Corporation		
Manufacturer (Company)	Fuji Photo Film Co., Ltd.,		
Year Manufactured	1988		
Reason For Selection	<p>This was the digital camera test model in which image captured by a CCD camera was, for the first time, successfully recorded as digital signal on a memory card. It created still image data from one field or one frame of a movie taken through the video camera. It was able to store ten image fields and five image frames on a 2Mbit SRAM card. It measures 105(W)×75(H)×50(D) mm and weighs 400 g. Unlike Sony's Mavica (1981), an earlier electronic camera model that stored data in analog format, the FUJIX DS-1P is a direct predecessor of today's digital cameras, and its invention gained for Japan international recognition for its unique scientific and technological advancements.</p>		
Registration Standard	1 - B
