Reason For Selection	<p>The world's first single-tube color video camera for home use that anyone can easily take a picture or video with simply by pressing a switch. The use of a unique color television pickup system called frequency interleaving, markedly improved the performance. Review of the manufacturing process made mass camera production possible for the first time, forming the beginnings of today's home-use cameras. This was the starting point for digital cameras and the cameras used in mobile phones and tablets that have changed our way of life.</p>		
Registration Standard	<p>1 - B(Show a uniquely Japanese scientific or technological development from an international perspective.) , 2 - B(Made a notable contribution by facilitating an epoch-making advance in Japan's economy and place in the world.)</p>		
Open/Closed to Public	Open to Public
