

**Typical example of the HA-1 type, which marked a new start for the postwar sewing machine industry**

Registration No.	Number 00346		
Registration Date	September 12, 2023	Registration Category	Category 1
Name (Model, etc.)	HA-1 Household Sewing Machine		
Location	Nagoya-shi, Aichi JUKI TECHNOSOLUTIONS CORPORATION		
Owner (Custodian)	JUKI TECHNOSOLUTIONS CORPORATION		
Manufacturer (Company)	Mitsubishi Electric Corporation		
Year Manufactured	1960		
Year first appeared	1947		
Reason For Selection	In 1947, after the war, Japanese sewing machine manufacturers collaborated to put together the "HA1 type sewing machine standard drawing" under the auspices of the Japan Sewing Machinery Manufacturers Association, and the machine was manufactured by various companies as the HA-1 type based on this drawing. This standardization contributed greatly to the performance, quality, and mass production of Japanese sewing machines. The selected machine was made by Mitsubishi Electric Corporation (currently JUKI TECHNOSOLUTIONS CORPORATION), which had been manufacturing sewing machines since before the war, and the instruction manual from that time has been preserved. It is significant as an example of the reboot of the sewing machine manufacturing industry after the war.		
Registration Standard	1-A (Show an important aspect or stage of the development of science and technology.)		

Open/Closed to Public	Open to Public (Reservation required)
