

The synthesizers that demonstrated the potential of MIDI functionality.

Registration No.	Number 00366		
Registration Date	September 10, 2024	Registration Category	Category 1

Name (Model, etc.)	【 Synthesizers with MIDI capability 】 (1) JUPITER-6 (2) JX-3P
Location	Hamamatsu-shi, Shizuoka Roland Corporation R&D Center
Owner (Custodian)	Roland Corporation
Manufacturer (Company)	Roland Corporation
Year Manufactured	1983
Year first appeared	1983
Reason For Selection	The Jupiter-6, which was released in February 1983, and the JX-3P, which was released in April of the same year, were connected to a Prophet-600 from Sequential Circuits on the January 1983 U.S.A. NAMM Show floor, becoming the world's first models to succeed in a MIDI transmission demonstration between products from different companies. MIDI is a digital interface that connects electronic musical instruments, and its protocol is still used today as an information transmission standard for electronic musical instruments and sound sources. These items are important as models that expanded the potential of digital music through MIDI technology.
Registration Standard	2-A (Played a notable role in improving people's way of life and creating new ways of living.)
