

Digital camera equipped with a 3.5-inch micro floppy disk

Registration No.	Number 00343		
Registration Date	September 13, 2022	Registration Category	Category 1 (multiple identical products such as mass-produced products)

Name (Model, etc.)	Digital Mavica (MVC-FD5)
Location	Minato-ku, Tokyo
	Sony Group Corporation
Owner (Custodian)	Sony Group Corporation
Manufacturer (Company)	Sony Corporation
Year Manufactured	In around 1997
Year first appeared	1997
Reason For Selection	This digital still camera uses a 3.5-inch micro floppy disk (MFD) as a recording medium. For data transfer to a personal computer, which was the main tool for digital processing, tasks were easier and running costs were reduced compared to other methods at that time. It was possible to record 30 to 40 still images in standard definition and 15 to 20 still images with fine image quality in 640 x 480 dot JPEG format on one DOS format (2HD 1.44MB) MFD. It is an important indication of the spread of MFD-oriented technology.
Registration Standard	1-A (Show an important aspect or stage of the development of science and technology.)
