

The World's Highest-Performance Electrical Cable to Support Power Demand

Registration No.	Number 00179		
Registration Date	September 2, 2014	Registration Category	Category 1

Name (Model, etc.)	DC±500kV 1 x 3000mm ² optical fibre integrated, polypropylene laminated paper insulated oil-filled submarine cable		
Location	Koto City, Tokyo Metropolis		
	Fujikura Ltd.		
Owner (Custodian)	Fujikura Ltd.		
Manufacturer (Company)	Fujikura Ltd.		
Year Manufactured	1998		
Year first appeared	1998		
Reason For Selection	This cable was applied to the interconnection line linking the Kansai Electric Power Co., Inc. area with the Shikoku Electric Power Co., Inc. area, which has the world's highest design voltage and transmission capacity at DC±500kV/2,800MW. The conductor is huge at 3,000mm ² and it is the first time a polypropylene laminated paper with superior insulation properties has been used in a DC cable, reducing the thickness of the insulation in order to make cable diameter smaller.		
Registration Standard	1 - B(Show a uniquely Japanese scientific or technological development from an international perspective.)		

Open/Closed to Public	Closed to Public
