

Registration No.	Number 00065		
Registration Date	October 6, 2010	Registration Category	Category 2

Name (Model, etc.)	HITACHI X-ray CT Systems CT-H		
Location	Kashiwa City, Ciba Pref		
	Hitachi Medical Technical Academy		
Owner (Custodian)	Service Technical Academy		
Manufacturer (Company)	Hitachi Medical Corporation		
Year Manufactured	1975		
Reason For Selection	<p>This CT scanner was Japan's first head CT scanner that was operated at Fujita Health University in October 1975. It is noteworthy that this was acquired only one month after an EMI scanner, the first CT scanner invented, was delivered to Tokyo Women's Medical University. Being a first-generation machine, it took four and a half minutes to complete a scan, but it provided breakthrough results in diagnosis of head disorders and gained wide attention during its time.</p>		
Registration Standard	2 - A		

Open/Closed to Public	Closed to Public
