

Registration No.	Number 00067		
Registration Date	October 6, 2010	Registration Category	Category 1

Name (Model, etc.)	Colette Type Disc Brake Caliper with built-in parking brake function		
Location	Minami-Alps City, Yamanashi Pref		
	Hitachi Automotive Systems, Ltd.		
Owner (Custodian)	Hitachi Automotive Systems, Ltd.		
Manufacturer (Company)	Tokico, Ltd.		
Year Manufactured	1981		
Reason For Selection	<p>Invented in Japan by Tokico, this was the world's first disk brake that had a parking brake function and an auto adjuster for pad wear. During that time, the adjustor unit, the heart of this disk brake device, was exported by Japan to England, Germany, and Brazil. This disk brake technology was used in European and American cars and is manufactured at high volumes even today. This device is also used in many Japanese cars today; most of the current disk brakes with a parking brake function are of this type. This is a rare and valuable exhibit, having been originally installed as a rear disk brake for an early Nissan Fairlady Z model.</p>		
Registration Standard	1 - B
